

PEP Rally!

Electronics Recycling

Deliver prepped pallets to one of the drop off locations no later than December 15, 2016.

7th Annual Electronics Recycling Event

The Collection period is coming to an end for our 7th Annual Electronics Recycling Event. This easy and free event enables you to remove toxic electronic items from the trash stream. By responsibly recycling these electronics with ECS Refining we are ensuring that data is completely destroyed. The degaussing and smelting process used by ECS Refining takes old electronics breaks them down to 1" pieces then melts them into new materials ready for a new product life. All collections need to be either in palletized Gaylord Boxes or on shrink wrapped pallets prior to delivery to a drop-off location. This is the last year that televisions will be accepted. To coordinate your delivery, call your drop-off location point of contact. For questions please call Lori Gunn with PRPC at (806) 372-3381.
