Let's Move your Scrap...Metal that Is!

Are you feeling overwhelmed with the amount of metal lying around? Do you wonder if there are any options to recycle it? Well we have good news, you do have an option. Scrap metals can be hauled off for recycling! Many communities are already moving their scrap metals giving themselves a win-win solution to their scrap problem.

White-Hot Metal Facts

A used aluminum can is recycled and back on the grocery shelf in as little as 60 days. [Source: BIR]

Steel is the world's most recycled material, with nearly 50% of steel manufactured worldwide produced from scrap metal. [Source: ISRI]
